

Patch 2.6

NEW

- Added Log-out button feature when user is online
- Added auto log-out if the user is inactive (when online connection is detected)
- Added new dialog validation for Delivery Manifest on upload
 - If the tracking note is already received or RTS
 - Allows the user to continue to upload even if the tracking note is already upload
 - Can click invalid tracking note for immediate change status
- Character limit on '*received by*' and '*remarks*' in POD

Fixes

- Changed POD text status
